MIRA TRADING COMPANY

YOUR RELIABLE PARTNER

2024

ABOUT US

MIRA TRADING COMPANY

Our company, which made a flawless entry into the brokerage sector in 2011, has embarked on a magnificent journey of 13 years, firmly establishing its roots in the heart of food products. We have made it a principle to exceed our customers' expectations by tracing the story behind each product, following the trail of flavor and quality. Throughout these years of experience, we have not only conducted sales but also built a network of loyalty and trust. Now, in the light of our profound history and rich expertise, we are taking a new step to provide our customers with more effective and efficient services. With our team specialized in a wide range of food products, we develop strategic approaches to increase your sales and continue to grow together with you.

Our Values

- To protect the health of our customers and team members through 100% natural food production
- To farm and process food with environmental sensibilities
- To constantly seek improvements in our systems, operations

Our Manufacturer use gray water collection and recycling systems to mix their fertilizer run off water back into our irrigation water. This system protects surrounding farmlands, nearby rivers and aquifers. As an added advantage, they benefit from reduced production costs.

They also use IPM techniques (integrated pest management) during cultivation. Just one aspect is the predatory insects (*Nesidiocoris tenuis*) which roam freely inside the greenhouse and feed on pests. These pests would otherwise have to be eliminated using chemical pesticides.

As a result, their team does not get in contact with chemicals, and our tomatoes are healthier for our customers.
